Jack spends most of his time dreaming of marrying the Princess, thus becoming rich and saving his family from being evicted from their tiny cottage by their cruel landlord, the Baron Smug.

As this notion is plainly pure fantasy, the hapless lad is despatched to market to raise money by selling the family cow.

Jack has no more success at the market than he does in any other walk of life, even when assisted by his sister, Lizzie, and her boyfriend, Zak.

The cow is eventually swapped for a handful of supposedly magic beans provided by a mysterious old lady.

Needless to say, Jack's family are less than impressed by his efforts and the beans are thrown away.

Overnight a huge beanstalk appears. This apparently leads to the castle of an evil Giant, scourge of the whole kingdom and currently in possession of a goose able to lay golden eggs. As the Giant stole the goose from the King, its recovery would do Jack a lot of good in his efforts to woo the Princess.

Further impetus is now provided by news that the giant has kidnapped the Princess. Jack sets forth to climb the beanstalk, assisted by Lizzie and Zak, but hampered by an almost total lack of skill or bravery.

Reaching the castle, the intrepid trio are confronted by the Giant's band of ferocious Goblin helpers. Even Jack realises that his beloved Princess is in great danger. The arrival of Baron Smug and his men, in pursuit of the goose rather than the Princess, only serves to complicate matters.

However, in the best tradition of fairy stories, all is not as it seems and at least some of the characters live happily ever after. Whether Jack is one of them remains to be seen...
